Traffic lights have been using red, yellow, and green for more than 100 years. Now, there's talk about adding a fourth color. Some guess that this new color could be white. The idea comes from the world of artificial intelligence (A.I.) cars. These cars can "talk to" traffic lights. The A.I. cars would let the lights know when it's safe to go. So, if you see the light turn white, it means you can follow the A.I. car in front because it knows the road is clear. This idea raises an interesting question: Do we trust the color of the light or the A.I. car leading the way? It shows how our road system is changing with new technologies.

In the future, it's said that A.I. cars will have a significant impact on how traffic works. This means the A.I. cars and traffic lights will exchange information. The white light could become a sign for human drivers to follow the A.I. car ahead, as it can make safe decisions. Of course, this also means we have to trust the technology in the car in front of us. The continued growth of A.I. in transportation raises new questions about how things are changing on our roads.

36、Why is there talk about adding a fourth color to traffic lights?

- (A) To make them more colorful (B) Because people are bored with the current colors
(C) Due to the influence of A.I. cars (D) To confuse drivers

37、What colors have traffic lights been using for over 100 years?

- (A) Red, white, and green (B) Red, yellow, and green
(C) Yellow, and green (D) Red, yellow, and white

38、In the future, how are A.I. cars expected to influence traffic?

- (A) By causing more accidents (B) By changing traffic lights
(C) By sharing information with traffic lights (D) By taking away the need for roads

39~42

Safety is important, and sometimes we use bright lights or loud sounds to get attention. But what if a \$1000 NT bill was used for the same purpose? In Tainan, a fruit and vegetable market faced a challenge – a hidden step at the entrance. To solve this problem, market workers painted bright yellow lines on the step and added a warning message, "watch out for the step." They also came up with a creative idea by sticking four fake \$1000 NT bills on the step.

 entrance 入口 fake 偽造的；虛假的

While some people liked the creative idea, others worried it might not be safe. Some were worried that people could focus too much on the fake money and end up falling on the step. This started a discussion about whether this new idea might accidentally cause accidents. If you saw something that looked like \$1000 NT bills on the ground, would you check it closely?

39、What problem did the fruit and vegetable market in Tainan face?

- (A) A hidden door (B) A hidden step (C) A hidden sign (D) A hidden entrance

40、What safety worry did some people have about the fake money on the step?

- (A) People might focus too much on it and fall over. (B) It could be mistaken for real money.
(C) It might catch the attention of thieves. (D) It could cause a decrease in market sales.

 decrease 減少

41、What did the workers hope to get by using the fake \$1000 NT bills?

- (A) Increase market sales (B) Create a beautiful entrance
(C) Add a surprise (D) Draw attention to the hidden step in a creative way

42、What is the main topic of the passage?

- (A) Market sales plans (B) Safety ideas in markets
(C) Creative solutions for hidden steps (D) Importance of using fake money in Tainan's markets

43~44

The earth is getting warmer with more and more greenhouse gases in the atmosphere. To better understand how greenhouse gases heat up our earth, we should first know ____ (43) _____. A greenhouse is a special house made of glass for plants. It holds the heat of the sun so that the plants inside can grow better. Some gases in the atmosphere work like a greenhouse and can keep the heat of the sun, so we call them greenhouse gases. Greenhouse gases help our earth stay warm enough for animals and plants. In fact, ____ (44) _____.

There is, however, a big problem. More greenhouse gases than our earth needs are entering the atmosphere because of the way we live. For example, with a great number of cars, there is too much CO₂, a common greenhouse gas, and farm animals give off a lot of CH₄, another greenhouse gas. If we want to “cool down” our earth, a good start is to change our way of life, like driving less and eating less meat

 atmosphere 大氣層
